TECHNICAL PROJECTS

DadPro | Code
Python, Flask, HTML5, jinja2, Bootstrap 5, MySQL

- Developed a login/registration system that implements RegEx for validations, jinja2 for user input feedback, Bcrpyt for password encryption, and a MySQL database.
- Designed and built front-end UI with HTML5 and Bootstrap 5 to give a clean design that allows users to engage with multiple RESTful APIs.
- Utilized Python, Flask, and the MVC pattern to simplify development and render 10+ HTML templates to create smooth navigation and interaction.

NotNetflix | Code
JavaScript, MongoDB, Express.js, React, Node.js, JQuery

- Recruited and organized a team of 4 members. Minimized merge conflicts by utilizing workspaces in Visual Studio.
- Programmed custom RESTful API services utilizing Express.js that allow users to interact with the database.
- Utilized React and MVC to compose reusable react components which simplifies code and the user experience.
